

Kumudh T

Java Backend Engineer · Spring Boot · Kafka · Distributed Systems

kumudh.t@example.com | +91 90000 00000 | linkedin.com/in/kumudh-t | github.com/kumudh-t | India

SUMMARY

Java Software Engineer with 2 years of experience building enterprise backend systems. Experienced in Spring Boot, Kafka, REST APIs, CI/CD, and distributed systems. Passionate about scalable, event-driven architectures and continuously learning cloud-native technologies.

EXPERIENCE

Mphasis — Software Engineer

2024 — Present

Client: Charles Schwab

- Developed and maintained REST APIs using Spring Boot serving internal trading-support tools
- Built Kafka producers and consumers to process transaction events across 4+ downstream services
- Implemented Role-Based Access Control (RBAC) across API endpoints, reducing unauthorized access incidents to zero
- Wrote integration tests with JUnit and Mockito, raising module test coverage from 54% to 87%

Client: HP

- Optimized API response times by 35% through query tuning and targeted Redis caching
- Set up and maintained CI/CD pipelines using Bamboo, cutting average deployment time from 20 to 6 minutes
- Collaborated directly with frontend engineers to define and version REST contracts, reducing integration bugs across 3 sprint cycles

PROJECTS

Banking Transaction Processor

Java, Spring Boot, Kafka, Docker, PostgreSQL, Redis

Event-driven transaction pipeline processing ~12K events/min with idempotent consumers, retry logic, and a dead-letter queue.

Real-Time Inventory Sync Platform

Java, Spring Boot, Spring Cloud, Kafka, MongoDB, Kubernetes

Microservices platform keeping inventory consistent across warehouse, storefront, and POS systems via event choreography, achieving 99.95% sync accuracy.

Secure API Gateway & RBAC Service

Java, Spring Boot, Spring Security, JWT, Redis, Docker

Centralized API gateway handling authentication, RBAC, and Redis-backed rate limiting for internal microservices.

SKILLS

Languages	Java, SQL, JavaScript
Backend	Spring Boot, Spring Security, REST APIs, Hibernate / JPA
Messaging	Apache Kafka, Kafka Streams, Dead Letter Queues
Databases	PostgreSQL, MySQL, MongoDB, Redis
DevOps	Docker, Kubernetes, Jenkins, GitHub Actions, Bamboo

Cloud	AWS (EC2, S3, RDS)
Frontend	React, HTML, CSS, Tailwind CSS

EDUCATION

B.E. in Computer Science

Your College Name · Class of 2022
